

BE A PART OF THE NF NETWORK'S **Chromosome Club**

DID YOU KNOW?

The gene that causes NF1 is located on **chromosome 17** and the NF2 and Schwannomatosis gene is located on **chromosome 22**. It's these special chromosomes that affect our loved ones, friends, and neighbors. Often times, these chromosomes bring us together in unexpected ways, and now the NF Network is asking you to join us in taking the pledge to become a member of the **Chromosome Club!**

Support the **Chromosome Club!**

The **Chromosome Club** is a recurring gift program designed to unite its members to the NF Network and to individuals across the country who need your help and support. Recurring gifts ensure that the NF Network can continue to enhance the quality of life for those affected by NF by:

Supporting NF community with educational packets and resources

Promoting NF research through the NF Network Advocacy Program

Connecting NF families and individuals to specialized NF clinics

Hosting community events for support and spreading NF awareness

HOW CAN YOU HELP?

The NF Network's goal from now until the end of 2019 is to raise **\$10,000** to make certain we are ready to serve each of the 1,600 newly diagnosed NF families in 2020!

HELP ENSURE OUR FUTURE

Any donation helps us achieve our mission of promoting NF research and providing support for the NF community. In 2019, the NF Network touched the lives of over **2,000** individuals affected by NF. Your gift assists us in accelerating the search for treatments and a cure to end neurofibromatosis, provide outreach through education and awareness, advocate for federal funds for NF research, while also offering hope and support for those living with NF.

Together, we can make an impact. Join the **Chromosome Club today.**
